- Very easy pitch adjustment system
- Better arm regulation by screws
- Simplified motorization
- Total protection of the fabric in closed position.

# 600EX CASSETTE AWNING

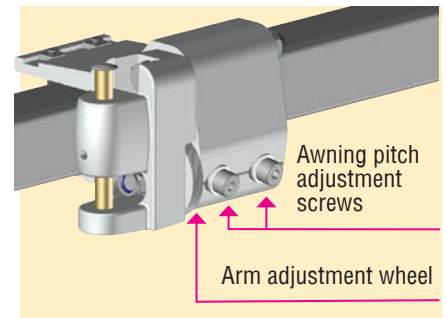

## MAXIMAL DIMENSIONS

Width: 7.00 metres  
 Projection: 4.00 metres

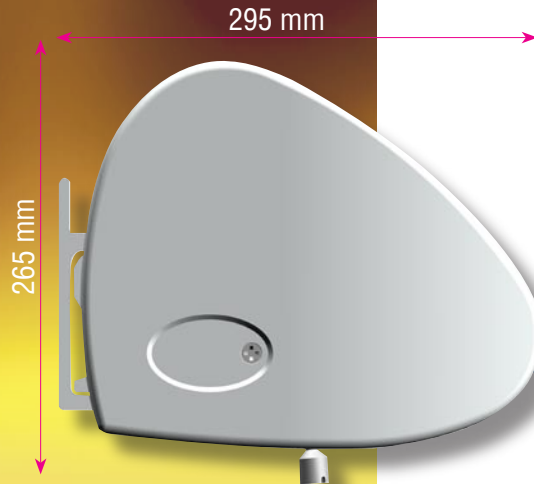

Pitch adjustment from 0° to 20°  
 operation by gear box or motor

This cassette awning uses the assembly conception of a monobloc. All the components are mounted on a 50mm square tube.

The extruded aluminium parts enable to design this large projection awning: 4.00 metres

The arm brackets enable a pitch adjustment of the awning from 0 to 20°. A height adjustment of the arms has been integrated thanks to a wheel for a perfect position.

The fixation supports in extruded aluminium ensure a simple and quick installation of the awning. You fit it, you screw it!
